Improwised
TECHNOLOGIES PVT. LTD.

Improwised Technologies

Empowering Developers, Accelerating Delivery

About Us

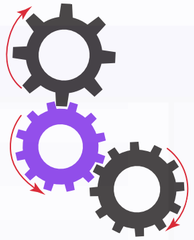
Improwised Technologies was started with two techno entrepreneurs, Rakshit Menpara and Shailesh Davara in 2011 with a small office, and now it has turned into an organization with a team of passionate developers, designers, and other IT engineers who are ready to tackle the challenges of cloud infrastructure services, product modernization services, complex automation services, and tech consulting and development.

We at Improwised technologies have always believed that self-improvisation is the key to progress. To meet our clients' needs, our team remains committed to learning and evolving their knowledge base.

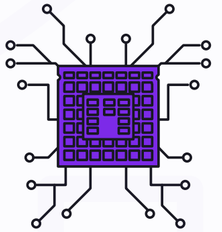
In today's world, software, cloud web services, and other internet technologies are emerging as key elements for any field to grow. Our vision is to use automation and technology to save human power and time.

Our Mission

Developing efficient systems for our customers to help them perform better.



In order to deliver more value to our customers, we continuously improve our knowledge of technology and internal processes.



We strive to expand the frontiers of technology and bring out new capabilities of our customers.

Our Core Values

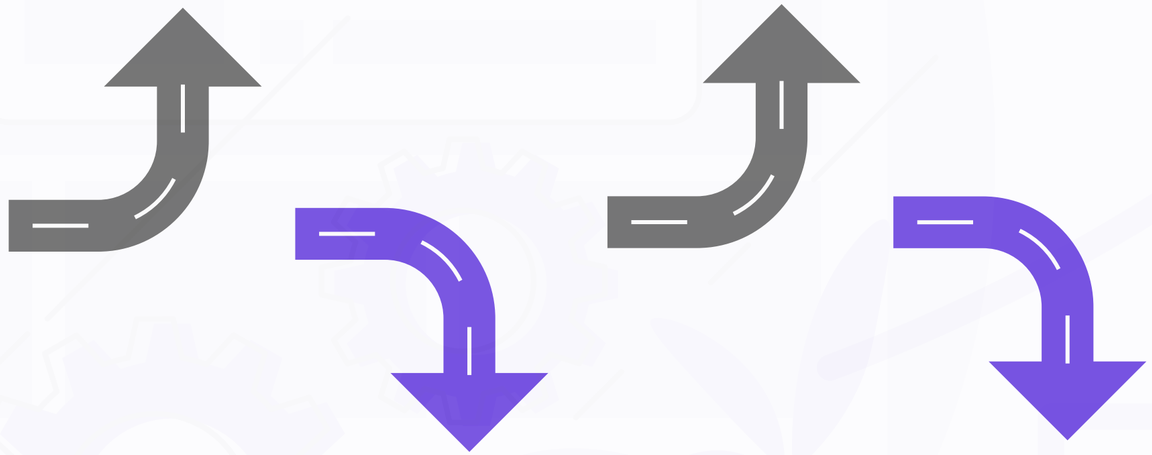
Improwised TECHNOLOGIES PVT. LTD.

Efficiency

Define clear, measurable financial goals for the short, medium, and long term.

Uncomplicated Technical Solutions

Create financial projections based on different scenarios to guide decision-making.



Forefront of Technology

Outline strategies to achieve these goals, including revenue growth and cost management.

Elegance

Ensure financial goals are aligned with overall business objectives to support growth and stability.

Our Services

Improwised
TECHNOLOGIES PVT. LTD.

Platform Engineering

Boost developer efficiency with Platform Engineering , delivering scalable internal developer platforms across cloud-native, hybrid, and multicloud architectures.

Cloud Infrastructure Services

Leverage our expertise in cloud platforms to modernize IT infrastructure, optimize business processes, and seamlessly integrate cloud services for maximum efficiency and scalability.

Product Modernization

We offer end-to-end Legacy System Modernization Services, including consultancy, technology upgrades, application modernization, and cloud transformation, to help businesses enhance performance, scalability, and usability.

Technology Consulting

We offer end-to-end technology consulting services, guiding businesses through IT modernization, strategy development, and seamless implementation of cutting-edge technologies to transform ideas into scalable, revenue-generating solutions.

What is Platform Engineering & Platform?

Improwised TECHNOLOGIES PVT. LTD.

Platform Engineering standardizes architecture, tools and hides underlying complexities for developers.

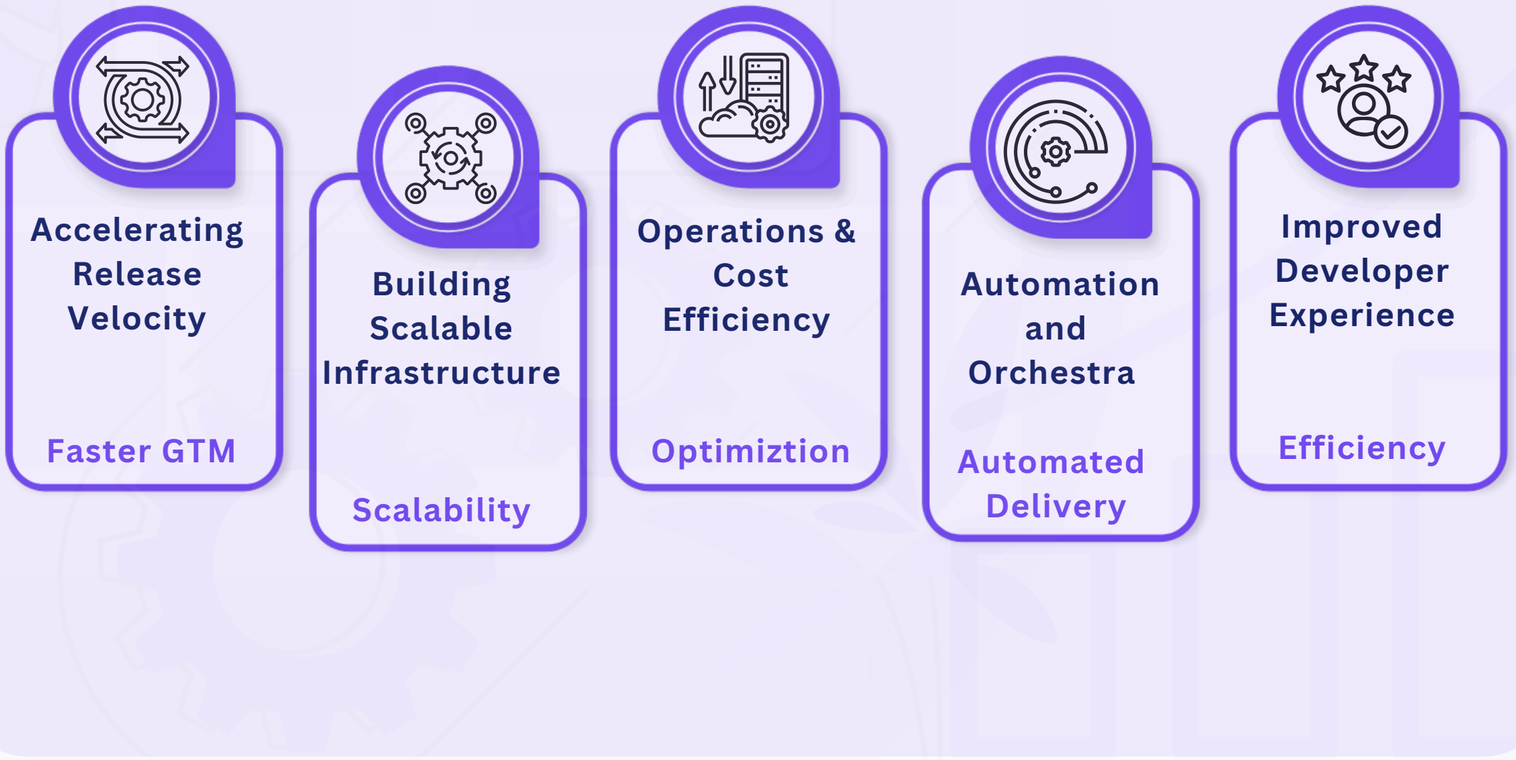
Our **platform** integrates processes and tools, simplifying development

Dev Team

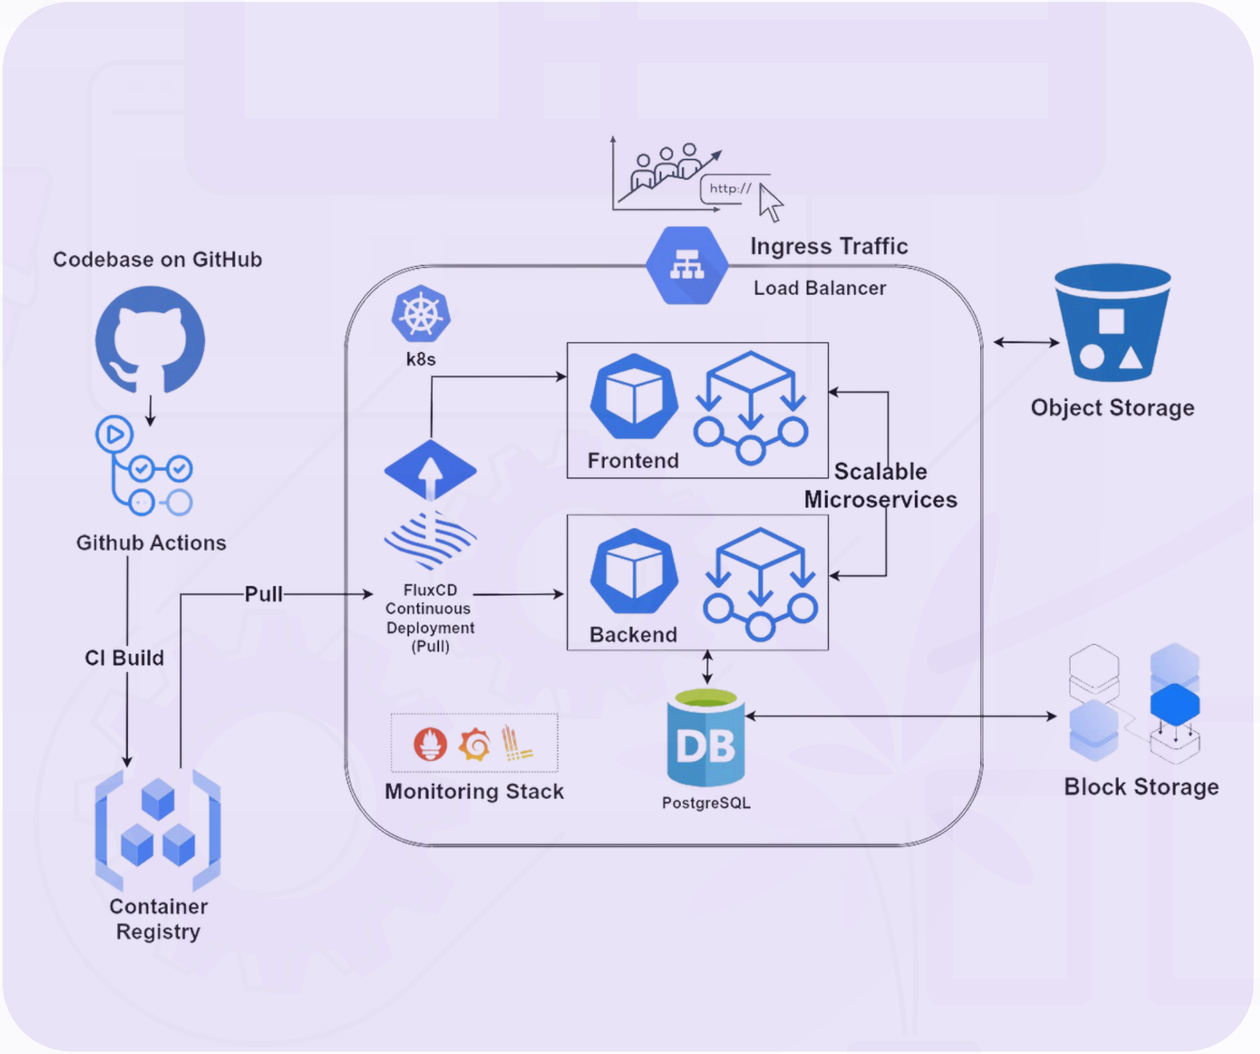
Developers commit code to the repositories and platform handles and **orchestrate clean deployment effortlessly**

How self-service Platform Helps?

Improwised TECHNOLOGIES PVT. LTD.



System Architecture



Why Us?

Improwised
TECHNOLOGIES PVT. LTD.

Self-Service & Open Source

Tailored Platforms as per required customization

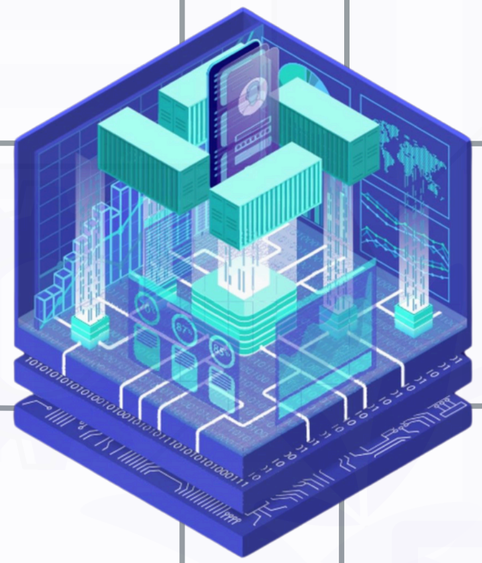
No Third-Party Lock-In

Multi-Cloud, Hybrid Cloud, On-Premise & Any Cloud Provider

The Building Blocks of a Platform

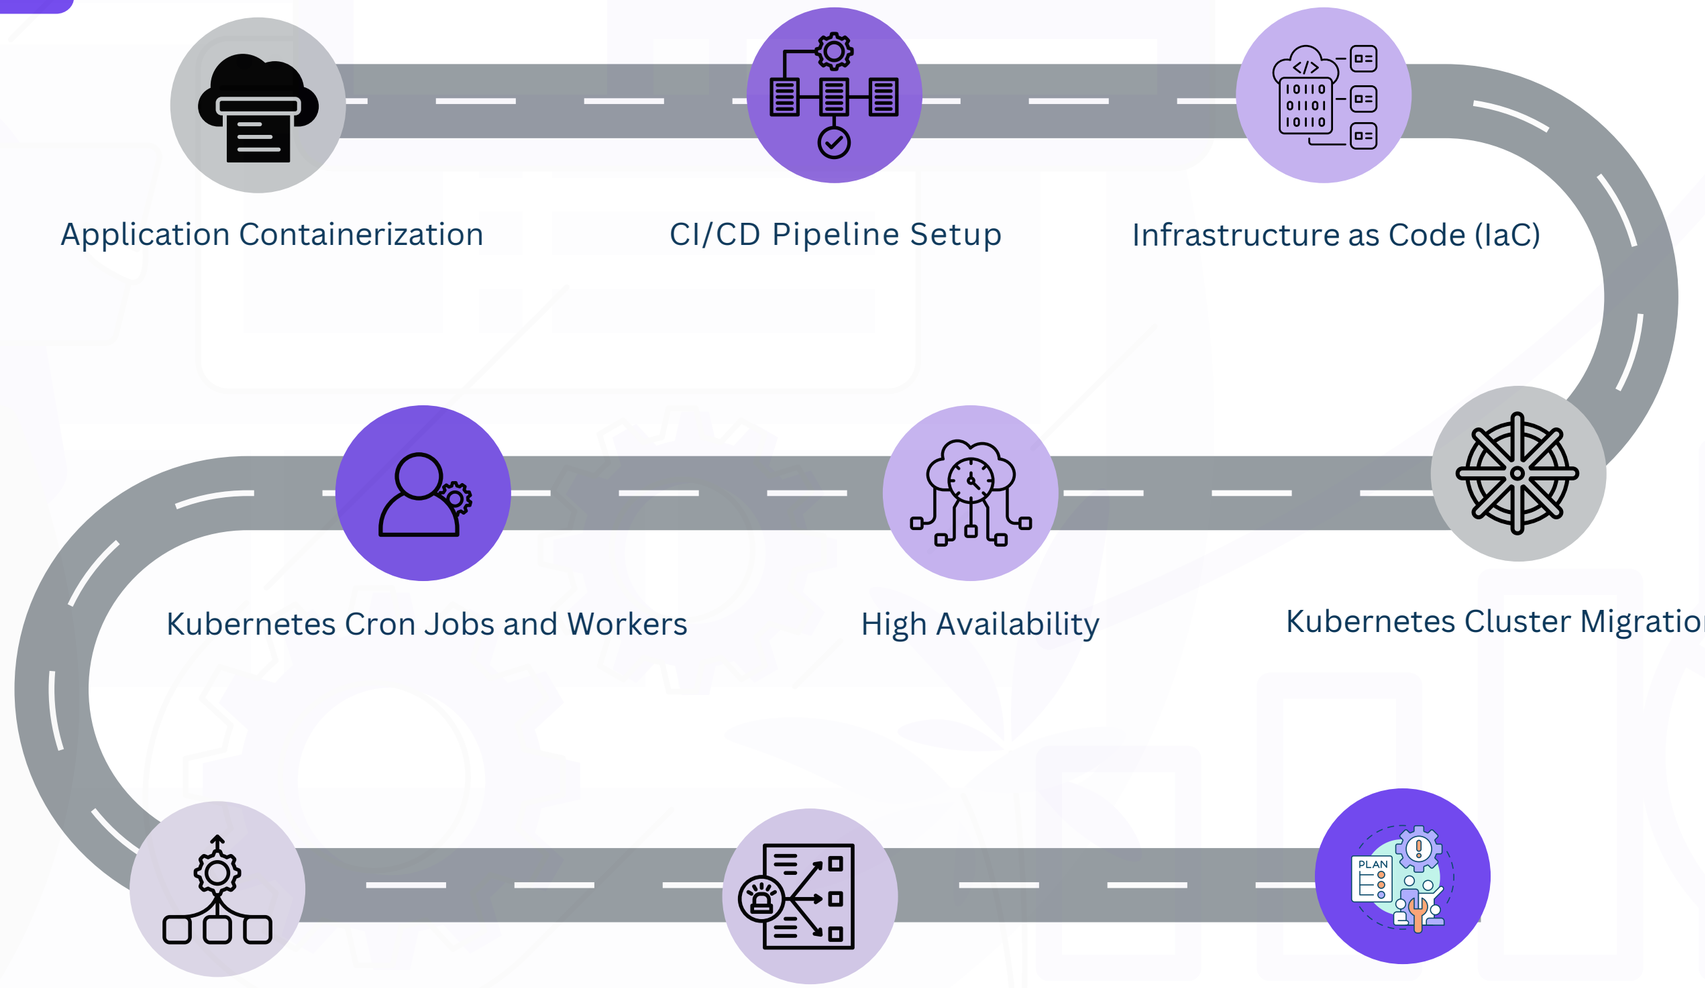
Improwised TECHNOLOGIES PVT. LTD.

- Automated Workflows (CI/CD
- Containerization
- Kubernetes Integration
- Monitoring
- High Availability
- Resilience
- Security
- Cost Efficiency



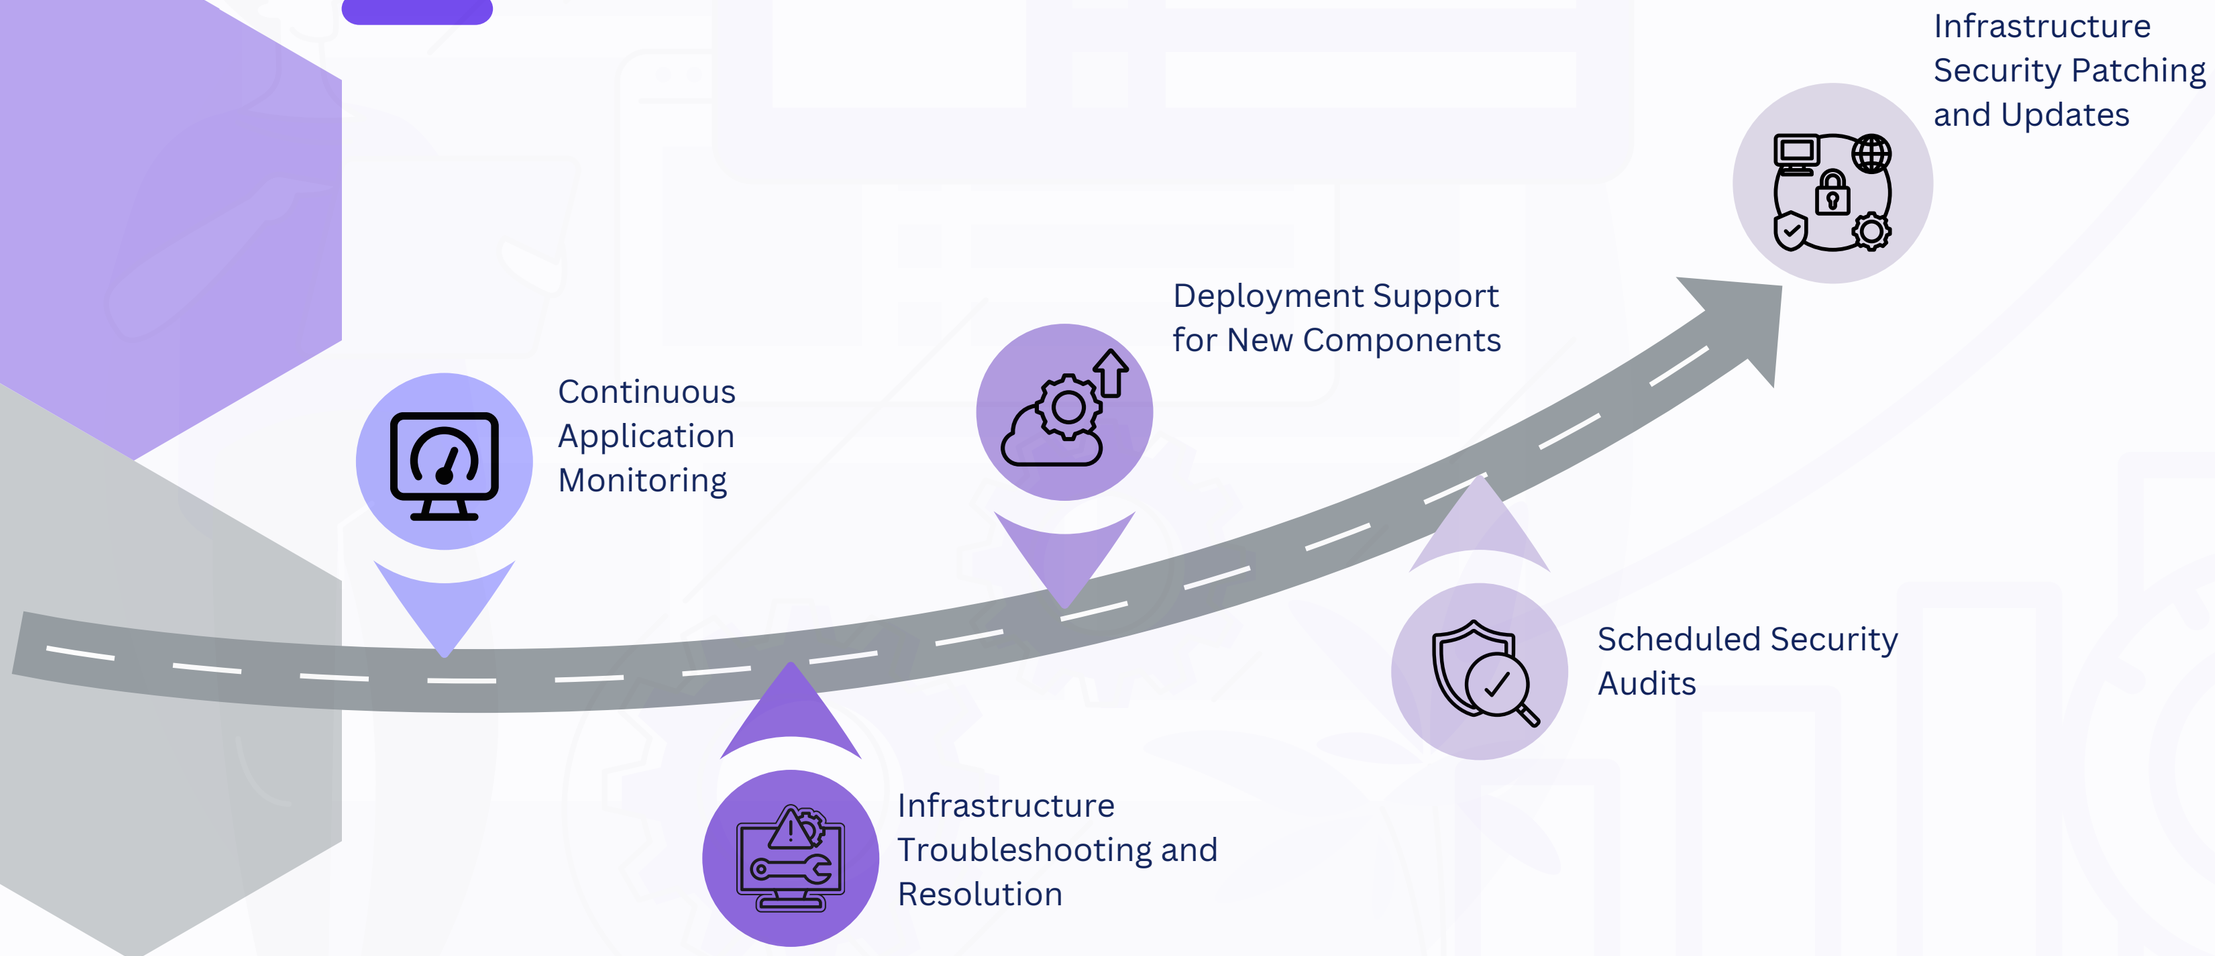
Our Approach - Scope of Initial Implementation

Improwised TECHNOLOGIES PVT. LTD.



Our Approach - Scope of ongoing Maintainance

Improwised TECHNOLOGIES PVT. LTD.



Case Study : Accelerating Deployment Frequency

Improwised TECHNOLOGIES PVT. LTD.

Our client in Malaysia, who operates a Healthcare Management System (HMS), experienced lengthy software release cycle of 3 weeks. With the implementation of platform engineering practices, we've managed to reduce this turnaround time to just 3 days.

Here's how this transformation benefits them:

- Faster Updates
- Reduced Risk
- Increased Efficiency
- Business Agility
